

Wave XL with Silent Gliss 5400

Wave® –  
A new Dimension in Curtain Making

A large window with white curtains is the central focus of the image. The curtains are partially open, revealing a view of trees and a clear sky. In the foreground, a dark table holds a bowl of red pomegranates. The overall scene is bright and airy, with natural light streaming in from the window.

## Wave XL – The perfect wave was worth waiting for.

Only a curtain from Silent Gliss can make waves whilst at the same time radiating tranquillity and harmony. With the new Wave XL we have given the classic a spectacular new appearance. It could be regarded as a design feature. Or, with a total lack of modesty, as the most beautiful contemporary curtain in the world.

## Wave XL – Applications

Wave XL reflects the current trend towards smooth rounded forms and shapes in today's interior decoration. It offers new alternatives for high and large application areas such as lobbies, entrance halls, reception areas, conference- and board rooms, bars and restaurants as well as for generously designed private homes and lofts.

The new Wave XL is available with a range of the curtain rail systems of Silent Gliss, either hand or electrically operated.

Wave XL is more than just a new curtain heading system. Ambitious and sophisticated technique combined with precise finishing and carefully selected fabrics are required to ensure the perfect functioning of this ambitious new curtain system. It demands technical competence and experience: Silent Gliss – the right partner for those requirements.

## Wave® Standard

Even with a smaller radius, the Wave® Standard produces calmness and a well-proportioned atmosphere in the room. The current Wave® solution with its fixed 60mm or 80mm glider cords within the curtain track, limiting the extension of the curtain fabric, also creates a smooth and continuous wave effect.

A modern curtain heading system, combined with a suitable fabric guarantees to become a real eye-catcher in every room.

## Fabrics

A perfect regular wave line is only assured when using fabrics with certain characteristics and features. All fabrics from the Silent Gliss collections were thoroughly tested on both systems Wave®/Wave XL and carefully selected. The fabrics suitable for Wave XL, Wave® or both are individually labelled with the following pictograms.

Left: Wave® Standard

Right: Wave XL

# Wave XL

Wave XL is available single or pair stack with the following Silent Gliss Systems:

	Hand drawn systems Silent Gliss 6100, 6130, 6290	Cord operated systems Silent Gliss 3840, 6120	Motorised system Silent Gliss 5400
Maximum width	6m	6m	10m
Minimum width	77cm (single stack); 154cm (pair stack)	77cm (single stack); 154cm (pair stack)	77cm (single stack); 154cm (pair stack)
Maximum drop	3m	5m	5m
Maximum surface	18m <sup>2</sup>	30m <sup>2</sup>	50m <sup>2</sup>
Minimum bending radius	50cm	50cm	50cm
Maximum curtain weight	-	8kg	15kg

Due to the large wave radiuses a minimum distance of 22cm between the track and the wall is required. The curtain stack size depends on the total system width. The depth of the curtain stack is always 35cm.

# Wave® Standard

The curtain heading system Wave® Standard is comprised of four basic elements: The special glider-cords SG 6345 (60mm) and SG 6346 (80mm), the curtain tape SG 6349, the iron-on tape SG 6363 and the curtain hook SG 3582.

Wave® Standard is available with the following Silent Gliss curtain track systems:

Hand drawn curtain tracks: Silent Gliss 3840, 6130, 6100

Cord operated curtain tracks: Silent Gliss 3840, 6120

Motorised curtain track systems: Silent Gliss 5300, 5400

The fullness and wave depth of the curtain depends on the selected glider cord and the applied spacing between the curtain hooks. The stack depth varies between 8cm and 14cm.

Example of largest Wave® curtain effect using 80mm glider-cord with 160mm curtain hook spacing.

Example of smallest Wave® curtain effect using 60mm glider-cord with 100mm curtain hook spacing.

Silent Gliss is the leading global supplier of motorised and manual curtain and blind systems in the high quality market. We offer our customers the very best in terms of quality, design, technology, service and individuality. Our core competence is innovation - inspired and driven by customer needs.
